Lesson 07: Teradata Popular OLAP Examples

#### Module Object

- To be familiar with popular OLAP functions.
- To be familiar with the PARTITION By concept.
- To be familiar with RANK() . ROW\_NUMBER(), QULIFY functions.

#### Q&A

- 1. Which two partitioning expressions are available to both single
  - level and multi-level partitioned tables? (Choose two.)
  - A. MODULO\_N partitioning
  - B. CASE\_N partitioning
  - C. RANGE\_N partitioning
  - D. Direct partitioning on a numeric column

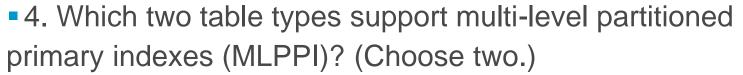

- 2. What are two reasons a customer would choose table
- partitioning? (Choose two.)
  - A. to improve performance of full table scans
  - B. to reduce the I/O for range constrained queries
  - C. for better distribution of data between the AMPs
